

Mr. Greg Stiles,

My name is Neil Adler and I am interested in the production artist position which has recently become available at the Community Colleges of Spokane in-house design department. I am a graduate of the graphic design program at Spokane Falls Community College and am also a graduate of the web design program at Interface Computer School. I feel that through my experience at SFCC, Interface Computer School and along with a year and a half of free-lance experience I would make an excellent candidate for the position.

I am skilled in a number of applications including: Photoshop, QuarkXpress, Illustrator, Dreamweaver and Lightwave 3D. I also have experience in Fireworks and Freehand. In the free-lance work I have done I have produced video package designs, web graphics and 3D animations. In the graphic design program I worked on many projects including: poster design, newsletter design, annual report design, web design, and direct mail piece design.

Included with this letter is an example sheet of my work. I am excited about the potential for this position and I look forward to speaking with you in person.

Thank you for your time and consideration

Neil Adler
