April, 2008
"The rapid increase of infectious disease is just one of the many impacts of global warming. If every household replaced five standard lightbulbs with compact fluorescent bulbs, it would save as much energy as removing 8 million cars from the road. Do your part."

"Flooding and extreme weather conditions are just one of the many impacts of global warming. If every person planted just two trees a year, it would completely counter all global warming caused by deforestation and logging. Do your part."

"Widespread, large scale forest fires are just one of the many impacts of global warming. If everyone used warm water, rather than hot, while bathing it would completely counter all global warming caused by air travel. Do your part."
